

THE HEALTH CARE WORKFORCE NETWORK

Across the health care continuum and throughout the country, health care organizations are improving their operations and strengthening their organizations by investing in their frontline workforce. The National Fund for Workforce Solutions, CareerSTAT, and their partners are working to expand, support, and accelerate this business-led movement.

THE NATIONAL FUND AND HEALTH CARE INDUSTRY PARTNERSHIPS

The National Fund for Workforce Solutions supports the development and expansion of industry partnerships, which are dynamic collaborations of regional employers who convene regularly with the assistance of a workforce intermediary to discuss shared human resources issues, exchange information about industry practices, and take specific actions to address workforce challenges. The National Fund currently supports 21 health care partnerships working to develop their regions' health care workforce.

CAREERSTAT

CareerSTAT is an employer-led movement of health care leaders promoting business investment in the skill and career development of frontline health care workers. An initiative of the National Fund for Workforce Solutions, CareerSTAT encourages these investments by engaging health care leaders who are pursuing these investments, recognizing employers making substantial investments in frontline workers, documenting and disseminating effective practices and the business impact of frontline programs, and fostering wide-spread adoption of these practices and investments. For more information, please visit www.nationalfund.org/careerstat.

FRONTLINE HEALTH CARE WORKER CHAMPIONS

CareerSTAT's Frontline Health Care Worker Champion recognition program acknowledges health care organizations investing in their frontline workforce. Recognized organizations are designated as 'Champions' and 'Emerging Champions.' Champions meet all of CareerSTAT's recognition criteria, including making skill and career development accessible, offering programs at a significant scale, measuring program business impact, and building sustainable programs. Emerging Champions are in earlier stages of investment and working with CareerSTAT leadership to strengthen their programs and achieve Champion status.

As a movement of hundreds of individuals in dozens of organizations, CareerSTAT and the National Fund acknowledge the following CareerSTAT Frontline Health Care Worker Champions and health care industry partnerships working to foster investment in America's health care workforce.
